Business Outlook

Overview

- Group's revenue remained flat (2QFY19 vs 2QFY18)
- **CE:** revenue decline (2QFY19 vs 2QFY18) due to weak performance in smart lighting products and production disruptions at Danshui Factory in late September due to flash flooding;
However, there is an 11.1% increase in CE revenue in Q2FY2019 as compared to Q1FY2019.
- **ICE:** Continued double-digit revenue growth, benefitted from strong performance from printer and automotive customers

Supply chain

- Some relief in the supply chain challenges with the normalisation of lead times and stabilisation of prices in passive electronic components.

Business Outlook

Macro environment

- Operating in an uncertain macro-economic environment caused by geo-political and trade tensions. The trade tension, if escalated, could potentially undermine the global economy and impact the supply chains of companies serving US market
- Whilst there is no material immediate direct economic impact at this juncture, indirect and consequential impact cannot be ruled out if the trade tensions were to escalate
- Have been working with customers in evaluating various measures to mitigate impact of tariffs on goods imported to US market, including options of assembly of products outside China

Reader should refer to section 10 of the Results Announcements for the complete commentary at the date of the announcement of the significant trends and competitive conditions of the industry in which the Group operates and any known factors or events that may affect the Group in the next reporting period and the next 12 months.
